Running | Activewear | Leisurewear | Accessories

Accanto ai nostri apprezzati best seller, arrivano due nuove proposte pensate per chi vuole dare il massimo in ogni allenamento. Siamo entusiasti di presentare **Running Pro** e **Activewear**, le nostre nuove linee dal taglio moderno e funzionale, ideali sia per gli appassionati della corsa che per chi predilige allenamenti più classici. Materiali tecnici, vestibilità ergonomiche e cura nei dettagli si fondono per offrire comfort, libertà di movimento e prestazioni elevate, dentro e fuori la palestra.

Neben unseren beliebten Bestsellern präsentieren wir zwei neue Linien für alle, die bei jedem Training ihr Bestes geben wollen. Wir freuen uns, **Running Pro** und **Activewear** vorzustellen – unsere modernen und funktionalen Kollektionen, ideal für Laufbegeisterte ebenso wie für Fans klassischer Workouts. Technische Materialien, ergonomische Passformen und Liebe zum Detail verschmelzen zu hohem Tragekomfort, Bewegungsfreiheit und erstklassiger Performance – im Fitnessstudio und darüber hinaus.

Alongside our popular bestsellers, we're introducing two new collections designed for those who give their all in every workout. We're excited to present **Running Pro** and **Activewear**, our new lines with a modern and functional cut, ideal for both running enthusiasts and those who prefer more traditional training. Technical fabrics, ergonomic fits, and attention to detail come together to offer comfort, freedom of movement, and high performance—both in and out of the gym.

### POLYESTER, “FIBRE TO FIBRE” RECYCLING: IT CAN BE DONE!

From upstream to downstream, circularity in textiles is feasible.  
Without compromises for the quality and technical performance of the products.

An ambitious research & development project, built step by step, which demonstrates the feasibility of “fibre to fibre” recycling in the field of polyester. It all starts from the desire of Sportstex, a company specialized in the production of sportswear, and RadiciGroup, a Group with many years of experience in circular economy, to collaborate for the recovery of polyester textile waste such as, for example, football, volleyball and other disciplines uniforms.

The involvement of Pure Loop, a company specialized in recovery machinery, was immediate, with the aim of identifying the best available technology and making it possible to obtain a new textile fibre.

To achieve this result, the R&D teams of the three companies carried out various experiments to obtain a recycled textile product that also had high technical characteristics. An initial result was obtained using a mixed recovery technique, “dosing” variable percentages of granules from recycled bottles (a more than consolidated practice in RadiciGroup) together with polyester granules from recycled fabrics. This experience then made it possible to gradually fine-tune the various processes and arrive at obtaining a yarn that comes 100% from the recovery of textile waste.

Once industrialized, this virtuous circularity system will make it possible to produce easily garments in recycled polyester that, at the end of their life, can be recovered again. Shimano was the first to embrace this sustainability project by putting its brand on the first jersey resulting from this supply chain collaboration.

The research project has highlighted a new way of recycling which allows obtaining quality polyester fibres starting, for example, from already used clothes, for a textile “Closed Loop”. Moreover, Erdotex, a company specialized in the sorting of used garments, will support the project: thanks to specific “sorting” procedures, Erdotex will make it possible to feed this innovative recycling process with the ambition of developing a real industrial process.

«Making textiles an increasingly sustainable sector is at the heart of the strategy of Radici InNova, the RadiciGroup company focused on innovation for circularity – underlines Gianni Todaro, R&D Specialist Apparel and Technical, RadiciGroup Advanced Textile Solutions– For some time now, in synergy with our customers and suppliers and making our knowledge available in the recovery of textile waste, we have been designing innovative proposals with high technical performance that respect the environment».

«In recent years we have prioritized environmental stewardship, taking significant actions to reduce our ecological footprint. However, the “fibre to fibre” recycling brings our effort to the next level. This approach enables us to create a fully closed loop system from products to consumers right here in Europe. Both our customers as well as other European manufacturers will benefit from this innovation» says the CEO of Sportstex and Cottontex.

«Recycling has enormous potential in the fibre and textile sectors. One thing I am sure about is that recycling will become a standard feature within the industry in the future. That is why I am especially pleased that this pilot project, initiated by the RadiciGroup, sees us taking an important step towards a more sustainable production of fibres and textiles. We are proud to have contributed the recycling technology part of the project with our ISEC evo FibrePro:IV,” says Merlijn van Essen, Sales Manager at PURE LOOP.

Thanks to this project, the companies involved have proven the feasibility of circular economy and recycling projects, which make it possible to valorise materials that otherwise would be considered waste, reducing the environmental impact of the textile sector. A good result that demonstrates how combining different skills can contribute to a greater respect for the environment and to the construction of a future based on the circular economy.

**RADICI GROUP** – With approximately 3,000 employees, sales of €1.542 billion in 2022, and a network of production units and sales offices spanning Europe, North and South America, and Asia, RadiciGroup today is a worldwide leader in the manufacture of a vast range of specialty chemicals, polyamides, high performance polymers, and advanced textile solutions, including nylon and polyester yarns, recycled yarn, bio yarns from renewable sources, nonwovens, and personal protection equipment for the healthcare and manufacturing sectors. Its products build on advanced chemical know-how and the vertical integration of the polyamide supply chain. They are developed for applications in a wide variety of industry sectors, including the Automotive, Electrical/Electronic, Consumer Goods, Apparel, Furnishings, Building, Home Appliances and Sports sectors. Underpinning the RadiciGroup's strategy is an overriding commitment to innovation, quality, customer satisfaction, and social and environmental sustainability. With its macro business areas – Specialty Chemicals, High Performance Polymers and Advanced Textile Solutions – RadiciGroup is part of a broader industrial group encompassing textile machinery (ITEMA), energy (GEOGREEN) and the hotel business (SAN MARCO). [www.radicigroup.com](http://www.radicigroup.com)

**PURE LOOP** – a subsidiary of EREMA Group GmbH, specialises in combined shredder-extruder technology for the highly efficient recycling of clean production waste. The headquarters are in Anselden/Linz. PURE LOOP recycling solutions are characterised by optimum adaptation to the existing scrap material logistics as well as the highest level of return of recycled pellets to the production process. Customers also benefit from the experience, technological know-how and innovative strength of the entire EREMA Group. [www.pureloop.com](http://www.pureloop.com)

**SPORTSTEX** – Sportstex is the umbrella brand that brings together Texmarket and Cottontex. Texmarket is the sales powerhouse, while Cottontex is the manufacturing expert. Our slogan, “Your producer for your brand”, reflects our mission: helping you build and grow your brand. We offer a wide product range, covering everything from cycling and running gear to triathlon, winter sports, activewear, team sportswear and athleisure. We are among the largest clothing manufacturers in Europe and are committed to delivering high-quality sportswear tailored to your needs. [www.sportstex.eu](http://www.sportstex.eu)

**ERDOTEX** – Erdotex Group is a leading company within the post-consumer textile environment, aimed at collection and sorting. Founded over 30 years ago, the group currently employs over 350 people and processes over 45 million kg's annually. With offices and facilities in the Netherlands, Germany, Belgium, and the UAE, it is able to serve globally. Erdotex Group has grown to become a trusted name in its field and can access through her partner network over 30 countries, offering a wide range of qualitatively sorted textiles and shoes for both reuse and recycling. Erdotex Group offers an extensive portfolio of products and services tailored to cater to the diverse needs of its customers and their markets.

**SHIMANO** – Shimano is a globally renowned company that specializes in the manufacturing of cycling components and fishing tackle. With a rich heritage spanning over a century, Shimano has established itself as a leading name in the cycling industry, consistently delivering high-quality products and innovative solutions to cyclists around the world. The company's commitment to precision engineering, performance, and reliability has made it a trusted brand among professional riders, enthusiasts, and recreational cyclists alike. Our product portfolio includes: Bicycle Components, Fishing Tackle, Cycling Apparel.

# CERTIFICATES

La certificazione ISO 9001 norma internazionale per i Sistemi di Gestione per la Qualità (SGQ), pubblicata dall'ISO (International Organization for Standardization), attesta la realizzazione di prodotti conformi e di qualità, fornendo delle precise indicazioni che favoriscano lo sviluppo di un sistema di gestione per la qualità all'interno dell'organizzazione.

Die ISO 9001-Zertifizierung, eine internationale Norm für Qualitätsmanagementsysteme (QMS), die von der ISO (International Organization for Standardization) herausgegeben wird, bescheinigt die Herstellung von konformen und qualitativ hochwertigen Produkten und liefert genaue Angaben, die die Entwicklung eines Qualitätsmanagementsystems innerhalb der Organisation fördern.

The ISO 9001 certification, an international standard for Quality Management Systems (QMS), published by the ISO (International Organization for Standardization), certifies the production of compliant and quality products, providing precise indications that encourage the development of a quality management system within the organisation.

La certificazione SA8000 è lo standard di riferimento riconosciuto a livello mondiale nato con l'obiettivo di garantire ottimali condizioni di lavoro. La Certificazione Etica SA8000 risponde alle esigenze delle organizzazioni che intendono distinguersi per il loro impegno nello sviluppo sostenibile, con particolare attenzione alle tematiche sociali.

Die SA8000-Zertifizierung ist der weltweit anerkannte Referenzstandard mit dem Ziel, optimale Arbeitsbedingungen zu gewährleisten. Die Ethik-Zertifizierung SA8000 erfüllt die Bedürfnisse von Organisationen, die sich durch ihr Engagement für eine nachhaltige Entwicklung auszeichnen wollen, mit besonderem Augenmerk auf soziale Belange.

SA8000 certification is the globally recognised reference standard designed to ensure optimal working conditions. The SA8000 Ethical Certification meets the needs of organisations that intend to distinguish themselves for their commitment to sustainable development, with particular attention to social issues.

La certificazione ISO 14001 rappresenta lo standard e il riferimento normativo per un "Sistema di gestione Ambientale" caratterizzato dallo sviluppo e dall'attuazione di una corretta politica ambientale e di una serie di obiettivi che impegnino l'organizzazione alla piena conformità di prescrizioni volontarie o dettate dal mercato di appartenenza.

Die ISO 14001-Zertifizierung stellt den Standard und die regulatorische Referenz für ein „Umweltmanagementsystem“ dar, das durch die Entwicklung und Implementierung einer angemessenen Umweltpolitik und einer Reihe von Zielen gekennzeichnet ist, die die Organisation zur vollständigen Einhaltung freiwilliger oder vom jeweiligen Markt diktiert Anforderungen verpflichten.

ISO 14001 certification is the standard and regulatory reference for an „Environmental Management System“ characterised by the development and implementation of a proper environmental policy and a series of objectives that commit the organisation to full compliance with voluntary or market-driven requirements.

Il Global Recycle Standard (GRS), promosso da Textile Exchange, è una certificazione che garantisce prodotti e processi con almeno il 20% di materiali riciclati, tracciabilità, limitazioni chimiche e rispetto di criteri ambientali e sociali, escludendo raccolta e selezione dei rifiuti.

Der Global Recycle Standard (GRS), gefördert von Textile Exchange, zertifiziert Produkte und Herstellungsprozesse mit mindestens 20 % recyceltem Material, Rückverfolgbarkeit, Einschränkungen beim Chemikalieneinsatz und Einhaltung ökologischer sowie sozialer Kriterien; Abfallsammlung und -sortierung sind nicht abgedeckt.

The Global Recycle Standard (GRS), promoted by Textile Exchange, certifies products and processes with at least 20% recycled content, ensures traceability, restricts chemicals, and enforces environmental and social criteria, excluding waste collection and sorting.

La certificazione Higg, sviluppata dalla Sustainable Apparel Coalition, valuta l'impatto ambientale e sociale dei prodotti tessili. Fornisce strumenti di autovalutazione per migliorare la sostenibilità lungo la filiera. Aiuta aziende e fornitori a monitorare e ridurre gli impatti negativi.

Die Higg-Zertifizierung, entwickelt von der Sustainable Apparel Coalition, bewertet die Umwelt- und Sozialauswirkungen von Textilprodukten. Sie bietet Selbsteinschätzungstools zur Verbesserung der Nachhaltigkeit in der Lieferkette. Unternehmen und Zulieferer können dadurch negative Auswirkungen besser steuern und reduzieren.

The Higg certification, developed by the Sustainable Apparel Coalition, evaluates the environmental and social impact of textile products. It offers self-assessment tools to improve sustainability across the supply chain. Companies and suppliers can monitor and reduce negative impacts more effectively.

## FABRICS - GREEN FABRICS

🇮🇹 Quando parliamo di riciclo, il nostro pianeta ha bisogno di azioni concrete. Questo principio lo possiamo applicare anche allo sport e nello specifico all'abbigliamento usato per l'attività sportiva. L'abbigliamento tecnico non deve diventare materiale di scarto e quindi rifiuto solido inutilizzato. I nostri tessuti ecologici e riciclati ECO sono la prova che è possibile agire per il bene del pianeta: sono sostenibili, ecologici, funzionali e Made in Italy.

Per poter produrre materiali riciclati, i rifiuti sotto forma di bottiglie di plastica PET vengono prima tritati in piccoli pezzi nell'impianto di riciclaggio e poi puliti. I piccoli pezzi vengono poi fusi ed estrusi in piccoli pellet. Da questi si produce il filato, che viene ulteriormente trasformato in tessuto. Infine, da questo tessuto ottenuto da bottiglie in plastica riciclate si realizzano prodotti come maglie da ciclismo, running e tanti altri sport.

🇩🇪 Unser Planet braucht konkretes Handeln. Wenn es um Recycling geht, lassen wir Worten Taten folgen. Technische Bekleidung sollte keine Belastung für die Natur darstellen. Unsere recycelten ECO-Stoffe sind der Beweis dafür, dass es möglich ist: nachhaltig, umweltfreundlich, funktionell und Made in Italy.

Um recycelte Stoffe herstellen zu können, werden zunächst Gebrauchsabfälle in Form von PET-Plastikflaschen in der Recyclinganlage in kleine Stücke zerkleinert und anschließend gereinigt. Die gereinigten Kleinteile werden dann geschmolzen und die dabei entstehende Masse wird durch Extrusion unter Druck in die gewünschte Form gepresst. Hieraus entsteht dann das Garn, welches zu Stoff weiterverarbeitet wird, aus welchem schließlich Produkte wie Radtrikots oder Laufshirts - bestehend aus recycelten Plastikflaschen - hergestellt werden.

🇬🇧 Our planet needs action. When it comes to recycling, we do not just talk the talk, but walk the walk. Technical apparel should not be a burden for nature. Our green, recycled ECO fabrics are the proof that it is possible: sustainable, eco-friendly, functional and Made in Italy.

To be able to produce recycled materials, the waste in the form of PET plastic bottles is first shredded into small pieces in the recycling plant and then cleaned. The cleaned small parts are then melted and the resulting mass is pressed into the desired shape by extrusion. From this the yarn is produced, which is further processed into fabric. Finally, products such as cycling jerseys or running shirts - consisting of recycled plastic bottles - are made from this fabric.

**1 FUNCTIONAL SHIRT**

**=**

**15 recycled 0,5L PET bottles**

 Sportstex, prende sul serio il rispetto per l'ambiente: per questo offre diversi tessuti „green“. I tessuti provengono da filati riciclati, privi di sostanze chimiche nocive e in linea con le severe linee guida internazionali.

 Sportstex nimmt den Umweltschutz sehr ernst. Wir bieten unseren Kunden deshalb verschiedene „green“ Stoffe an. Diese wurden in einem energieeffizienten Prozess aus recycelten Stoffen hergestellt und sind frei von umweltschädlichen Chemikalien. Dies geschieht im Einklang mit den strengen internationalen Richtlinien.

 Sportstex, aware of the respect for the environment, offers different „green“ fabrics. The fabrics originate from recycled yarns, free from harmful chemical substances and in line with the strict international guidelines.

## FABRICS - CARE INSTRUCTIONS

 Per assicurare un utilizzo duraturo nel tempo dei nostri prodotti, si consiglia di:

1. NON lavare i nostri prodotti ad una temperatura superiore ai 30 gradi, evitare ammorbidenti, sbiancanti o detersivi aggressivi.
2. NON usare asciugatrici! Lasciate asciugare i prodotti naturalmente. Fate attenzione: la luce solare diretta e le eccessive fonti di calore possono causare alterazioni dei tessuti.
3. NON stirare i nostri prodotti.
4. Se non siete sicuri della taglia, quando provate uno dei nostri campioni, scegliete quella leggermente più grande, poiché la vestibilità può variare a seconda dal peso e della costituzione. Attenzione: le nostre taglie sono soltanto indicative.
5. Per evitare il deterioramento del tessuto:
  - NON lasciare i capi per troppo tempo nel sacco della biancheria.
  - Lavarli subito dopo l'uso.
  - NON lasciare i capi in un posto umido oppure in un sacchetto di plastica.
  - EVITARE il contatto con il velcro, che è causa di pilling.
  - L'uso di zaini può deteriorare il tessuto a causa dell'attrito.
6. Tutti i capi tecnici devono essere usati esclusivamente nella disciplina per cui sono concepiti, questo per utilizzare al meglio le caratteristiche tecniche dei tessuti con cui sono realizzati.

 Um unseren qualitativ hochwertigen Produkten ein langes Leben zu sichern, bitten wir Sie folgendes zu beachten:

1. Waschen Sie unsere Produkte NICHT über 30 Grad, verwenden Sie milde Waschmittel und vermeiden Sie Weichspül- sowie Bleichungsmittel.
2. Trocknen Sie unsere Produkte NICHT im Wäschetrockner! Lassen Sie unsere Produkte vorzugsweise natürlich trocknen. Bitte beachten Sie, dass direkte Sonneneinstrahlung und exzessive Wärmezufuhr möglicherweise zu einer Beeinträchtigung der Stoffe führt.
3. Bügeln Sie unsere Produkte NICHT.
4. Sollten Sie bei der Musterprobe bezüglich Ihrer eigenen Konfektionsgröße unsicher sein, wählen Sie die nächstgrößere Größe, da die Kleidungsstücke abhängig von Körpergewicht und -bau anders sitzen können. Bitte beachten Sie, dass unsere Größenangaben nur als Anhaltspunkt dienen.
5. Um Stoffschädigung zu vermeiden:
  - Lassen Sie die Produkte NICHT lange im Wäschekorb - waschen Sie sie gleich nach dem Gebrauch.
  - Lassen Sie die Artikel NICHT an feuchten Orten oder in Plastiktüten liegen.
  - Vermeiden Sie den Kontakt mit Klettverschlüssen, welche Pilling verursachen können.
  - Das Tragen von Rucksäcken kann Reibung erzeugen und somit den Stoff beschädigen.
6. Alle technischen Kleidungsstücke dürfen nur in der Disziplin verwendet werden, wofür Sie konzipiert sind, um eine optimale Nutzung der technischen Materialien zu gewährleisten.

 To ensure the durability of our high quality fabrics, please consider the following:

1. Do NOT wash our products with temperatures above 30 degrees, use mild detergents, and avoid fabric softener and bleaching agents.
2. Do NOT use a dryer! Let our products preferably dry naturally. Please note that direct sunlight and direct heat may cause deterioration of the fabrics.
3. Do NOT iron our products.
4. If you are unsure of your own size when trying on one of our size samples, choose the slightly larger size, as fit can vary depending on body weight and build – please note that our sizes are just an indication.
5. To avoid fabric deterioration:
  - Do NOT leave the products in your laundry bag for a week - wash them straight after use.
  - Do NOT leave the products in humid places or plastic bags.
  - Avoid contact with velcro fasteners, which can cause pilling.
  - The wearing of backpacks can generate friction and thus damage the fabric.
6. All technical garments must be used exclusively in the discipline for which they are designed in order to best use the technical features of the materials with which they are made.
